

Core Services

Close Protection

Our carefully selected personal protection officers work with you to create a security programme to ensure any threat to you and your family is mitigated in the office, at home and whilst travelling.

Security Teams

A residential security team can be allocated to mitigate against crime and intrusion in private properties.

We deploy intelligent, culturally aware men and women, whose pedigree speaks for us.

Security Managers

A Security Manager can add value to any busy family office, business or household by managing the safety and security of all family members and staff. Our manager's work across the globe within overseas operations ranging from homes and businesses to construction sites and film sets.

Residential Security Surveys

We survey client's homes ranging from the country estates and villas to town and city penthouses and apartments. Our surveys are concise and readable and we will liaise with installers to efficiently upgrade home security measures.

Business Risk Assessments

Risk to a business comes from more than just break-ins. Our assessments look at everything from communications policy and reputation management to cyber security and online exposure. We can help to mitigate threats to a business from any angle.

TSCM Bug Sweeps

Our TSCM 'bug sweep' teams use the latest technology combined with years of technical experience to identify physical listening and monitoring devices. Our work can ensure that you, your family and your business have total privacy wherever you are.

Investigations

Running a successful investigation requires a tenacious and methodical approach and then sifting through vast swathes of material to identifying salient pieces of evidence. All of which requires skill and good judgment. Our analysts are experts at not missing anything, even the seemingly innocuous.

Surveillance

We use our targets own psychology against them in order to secure result, our surveillance operatives are highly experienced and many have backgrounds in law enforcement, the military or government allowing us to choose from diverse and unique sets of skills.

Forensics

Our state of the art Digital Forensics and eDiscovery service line can help you to prepare data in response to regulation or litigation, identify theft and add evidence to a legal case or dispute.
